# PRO-AV SOLUTION
## SPORT, CONCERT & RED CARPET

The rise of eSports and tournaments to online platforms has blossomed into a multi-billion dollar global phenomenon and continues to evolve and capture viewers in this fast growing industry. eSports has become a well funded gaming and tackled to the large viewer.

In large venue live production where multiple cameras are being deployed to cover crowds, players, arena stage, backstage, or a mixture of several gaming PCs onto multi-screen large projector and TVs distribution. HS-3200 features a variety of virtual background for Chromakeyers and PiP in single or combine functions. Short animated clips enable an interesting and effective transition.

The IP camera controller RMC-300C allows up to 24 cameras (PTC-150/BC-80) to be controlled by one hand. NVS-200-MINI compliment a complete solution for private IPTV channel and multiple live streams platforms.

Conventionally, such application can be deployed for Red Carpet for Movie launch and Nomination Awards, Gaming Competition, Online Casino and many more.
